### **MODE OF TEACHING**

Effective teaching and learning in higher education require continuous adaptation and integration of new technologies and pedagogical methods. The college believes in updating teachers with the latest technologies ensures engaging content delivery, enhancing the learning experience and always encourages teachers to attend orientation/refreshers /fdp programmes. Traditional lectures are made interactive with ICT tools like multimedia presentations, online quizzes, and simulations. New methods, such as flipped classrooms and peer teaching, cater to diverse learning styles and promote critical thinking. Student PowerPoint presentations develop communication skills and provide peer feedback opportunities. E-resources on the college website, including textbooks, research articles, and video lectures, support learning outside the classroom. Continuous professional development for teachers through workshops and training on the latest technologies and strategies is essential. Institutions also provide platforms for sharing best practices and innovative methods. Combining traditional and innovative methods, updating technologies, and encouraging new pedagogical approaches create a dynamic learning environment in the college and ensures teachers meet evolving educational demands.

Lakshita Thakur Assistant Professor Department of Sociology

Entering college holds a special place in every student's life. To enhance the academic abilities of students along with making them comfortable in a new environment, a Bridge course holds a very important place in the academic calendar. The Department of Sociology organised a bridge course for the new students for the session of 2023-24 from 20<sup>th</sup> July,2023 to 25<sup>th</sup> July, 2023. A lot of students who had never studied the subject attended these sessions and they were introduced to various aspects of the discipline. Various topics were covered for five days, which included a historical trajectory of how the course came into existence, it's subject matter and scope along with the career prospects that are available to the students after their graduation. The outcomes of the courses were that students were then able to understand how Sociology came into existence as a discipline, what all courses they will be offered over the next three years as well as the future career prospects after doing graduation in Sociology.
