# 5. BEST PRACTICES, INNOVATION AND INSTITUTION DISTINCTIVENESS

## 5.2. Special Initiative Taken for:

### I. Energy conservation/ use of Solar energy

#### *a. Roof top solar plants and purchase solar street lights is in pipeline*

The main energy source is renewable energy source in the form of hydroelectricity from H.P. State Electricity board. Solar energy is the renewable and abundant. Solar Roof Top Power Plant (50KW) has been installed in the college which has reduced the dependency on the grid and provided a buffer against fluctuating electricity prices. The electricity bill has been reduced to a huge amount per annum. An order has also been placed to HimUrja for the installation of solar streetlights under a HIMCOSTE project.
